

T7600 Modbus Thermostat Series

- STYLISH LOW PROFILE THERMOSTAT
- STANDALONE WITH MODBUS COMMUNICATION
- BACKLIGHT DISPLAY WITH TIMEOUT FUNCTION
- EASY FUNCTION KEYS LOCKABLE
- IDEAL FOR FAN COILS AND PACKAGE UNITS CONTROL

The T7600 Series includes the On/Off and Proportional thermostats designed to control heating and cooling in commercial, industrial and residential installation.

T7600 are equipped with Modbus RTU communication, which provide information to any building automation system in order to implement enhanced energy saving strategies.

When a T7600 thermostat is connected to the Johnson Controls Building Automation System METASYS® its remote mode selection and temperature control capabilities optimize performance management, help maximizing resource allocation by recording operational data. The METASYS scheduling capability helps in reducing energy consumption and improve savings in your facility.

- GREAT STAND ALONE
- EVEN BETTER WHEN COMMUNICATING
