

## T8800 BACnet Thermostat

- STYLISH LOW PROFILE TOUCH SCREEN THERMOSTAT
- STANDALONE OR BACNET NETWORKED
- BACKLIGHT DISPLAY WITH TIMEOUT FUNCTION
- EASY FUNCTION KEYS LOCKABLE
- IDEAL FOR FAN COILS AND PACKAGE UNITS CONTROL

The T8800 touch screen thermostats is designed to control heating and cooling in commercial, industrial and residential installation.

T8800 can communicate with any Building Automation Systems in BACnet MS/TP.

When a T8800 thermostat is connected to the Johnson Controls Building Automation System METASYS® its remote mode selection and temperature control capabilities optimize performance management, help to maximize resource allocation through recording operational data.

The METASYS scheduling capability helps to reduce energy consumption and improve the saving in your facility.

- GREAT STAND ALONE
- EVEN BETTER INTEGRATED IN METASYS

For more information on how T8800 Thermostats range can help you get more out of your building management investments, please contact your local Johnson Controls representative
